PREPARATORY SCHOOL

eSafety Policy

This policy applies to all pupils in the school including those in the EYFS

Date reviewed and approved by the Proprietor: September 2017 Next Review: September 2018

Introduction

ICT in the 21st century is an essential element for education, business and social interaction and forms part of the everyday lives of pupils, their parents and staff. Widford Lodge recognises the risks associated with such technology but believes that the benefits outweigh these and so we are committed to:

- Establishing ground rules for using technology whilst at school
- Educating pupils, parents and staff on esafety
- Teaching pupils how to behave and think to enable them to remain safe and legal, both inside and beyond the classroom
- Filtering the websites, networking and downloading available to all those who use the internet whilst on the school site.

We hold and process personal data about pupils, staff and parents/guardians for the purposes of:

- Administration
- Academic progress monitoring
- Organisation of school functions
- Historic records
- Student welfare
- Health
- Statistics and research.

We recognise that some of this information is sensitive and we intend to fully comply with the Data Protection Act 1998. Everybody at Widford Lodge School has a shared responsibility to secure and process correctly any sensitive information.

The purposes of this policy therefore are to:

- 1. Clearly define roles and responsibilities for online safety and how this links with our wider safeguarding strategy
- 2. Give clear guidance on the use of technology in the classroom and beyond, for all users, including staff, pupils, parents and visitors and outline restrictions and sanctions
- 3. Detail the school's technical provision and safeguarding mechanisms for filtering, monitoring and reporting inappropriate content
- 4. Detail how we build resilience in pupils to protect themselves and their peers through education and information
- 5. Outline the training and guidance given to staff with regard to online safety
- 6. Detail the reporting mechanisms for users to escalate issues and concerns and how these are managed
- 7. Outline how we inform, communicate with and educate parents/carers in online safety
- 8. Outline how personal data is managed in line with statutory requirements.

This policy is available on the school's website and should be read in conjunction with other policies, including our Safeguarding and Child Protection policy, our anti-bullying policy and our policy for the promotion of good behaviour.

1. Roles and Responsibilities for Online Safety

The Headmaster and Proprietor have ultimate responsibility for ensuring that this policy and the practices detailed within it are fully implemented and followed. The Designated Safeguarding Lead is Susannah Trowell (Deputy Head – Pastoral) and it is part of her role, along with Michelle Cole (Deputy Head – Compliance) and Andrew Blundell (Digital Learning subject leader) to keep abreast of current issues and to take prompt and appropriate action as necessary. Online safety and safeguarding children in their use of technology are vital parts of our wider safeguarding strategy, as detailed throughout this policy.

The Digital Learning subject leader routinely monitors the school's online reputation. Should anything be found that brings the school into disrepute, it will be reported to the Headmaster immediately and appropriate action taken.

2. Guidance on the use of Technology for all users

All staff are aware of the risks associated with technology and of the potential for misuse. The expectations placed on pupils are explained regularly and appropriately as their use of and exposure to technology widens.

Children are only allowed to use the internet on the school site while a responsible adult is present.

All parents of pupils joining the school are asked to read and sign the internet agreement (see Appendix A). Once pupils reach Form 3, and again in Form 5, they are also asked to read and sign the pupil internet agreement and are responsible for their own behaviour, including the materials they choose to access and the language they use. By signing this agreement, they are made aware of the restrictions on their online activity. Using technology sensibly and adhering to the internet agreement is a school rule and therefore forms part of our Policy for the Promotion of Good Behaviour. As such, any breaches are dealt with appropriately and sanctions applied according to the nature and severity of the incident.

Pupils have the opportunity to use edmodo – an online learning space designed specifically for schools. edmodo allows pupils and teachers to communicate with each other through posting messages, uploading pictures, attaching files or links. Pupils can only access and send messages to groups that have been set up and moderated by teachers. There is no private messaging between pupils. Teachers can edit or delete messages if necessary. Pupils must use standard English and follow politeness conventions. Such messaging is monitored by the relevant teacher for each group.

As part of the Computing curriculum, in every year group pupils receive advice on the benefits and risks of technology (see section 4 below).

Staff members are made aware of the school's procedures for safeguarding upon appointment. They are given guidance on how to use technology effectively and of the risks associated as part of ongoing training (see section 5 below). All staff are also made aware of the school's policy for the use of cameras, mobile phones and other wireless technology. All staff sign an acceptable use policy outlining their responsibilities and restrictions for the use of technology on the school site and for school related matters offsite and are therefore aware that they can be disciplined for any breaches of this policy.

When visitors sign into the Office, they are made aware of our online safety procedures, including the fact that they may not photograph or video children without prior permission, or access inappropriate material while on school premises.

3. Technical Provision and Filtering/Monitoring

Technical Overview

Widford Lodge's IT infrastructure is built on Microsoft Active Directory domain. This provides security and auditing for each user/pupil. Access to data resources are provided by security groups, whilst Group Policies maintain application and desktop control.

Web Monitoring and security is provided by a Barracuda appliance sitting in series with the Cisco ASA 5505 Internet Firewall. This controls and audits any Internet requests from any device that connects to the school's network (Tablet, PC, server etc.) This gateway device ensures there is no way to avoid what the school's internet policies enforce. Automated alerts are sent to the network administrator for investigation.

All PCs are Windows 7 Professional or higher and must be part of the security domain to gain access to network resources (providing user logging on has relevant security rights assigned to them).

PCs have Sophos Data Protection suite which provides AV, malware & 2nd line web defence to block unwanted websites. Sophos is controlled and monitored by a central server residing on the Domain controller. Any security or AV alerts are sent direct to the Network Administrators for investigation.

IPADs are controlled via a MAC Mini server. This ensures only authorised applications are installed onto the tablets via use of assigned policies.

One physical HP VMware ESXi server which hosts 4 virtual Microsoft Windows 2008 Servers.

Email is provided by Microsoft Office 365 (cloud based exchange server) and secured by SSL certificates for Outlook Web Access (phones & web mail if enabled for user). Multiple email spam & malware protection is provided within Office 365.

Password synchronisation between Widford Lodge domain controller & Office 365 ensures the password policy on the domain is replicated within the cloud environment.

Office 365 also provides a cloud based file sharing environment (SharePoint online) which allows access to essential files (i.e. if School Internet service goes down, or physical access problems prevent connection to the school's server). Office 365 provides full auditing & lock down of file access for data compliance.

Data Backups

All data is automatically backed up overnight to an online secure encrypted location. Encryption is FIPS 140-2n compliant.

SQL server is backed up daily to the local server and then uploaded to the secure remote location nightly. Regular 4 hourly snapshot backups are taken on the server for previous version restores. Office 365 (email & SharePoint) is backed up within the cloud automatically.

Internet Security

Internet security is provided by an enterprise class Cisco ASA 5505 Firewall. Web security & filtering is provided by a Barracuda 410 appliance which receives hourly content filtering updates. A weekly report of any attempts to access blocked sites, such as adult content, violence/terrorism/gaming is reviewed by the Senior Management Team and dealt with appropriately. At any time, the Headmaster or Designated Safeguarding lead can request Chelmer IT to produce reports of the online activity of any user or group of users.

Any issues raised by filtering or monitoring are dealt with promptly and sensitively.

Sophos Web filtering provides 2nd line of defence.

Staff are aware of the need to report immediately any instances of inappropriate content to the Digital Learning Leader, who will inform the Headmaster and Chelmer IT.

Server & firewall Security Update schedule

All Microsoft server operating systems are updated weekly. All clients are update weekly and controlled by MSUS server Sophos – Updated hourly and pushed to the clients every 2 hours Barracuda – Updates received every hour Cisco ASA – Updates applied where Cisco advisories are posted Office 365 – Updated automatically by Microsoft SharePoint Online - Updated automatically by Microsoft

<u>Software</u>

All software within the school is legally licensed and copies of the licences are held centrally. No software is ever installed which might compromise the security of the IT system. All software is acquired from legitimate publishers/re-sellers.

4. Building Resilience in Pupils

As detailed in section 2 above, all pupils are required to sign an internet agreement at the start of Form 3 and Form 5. As part of the Computing curriculum, pupils receive regular and age-appropriate guidance on safe and legal internet use and what to do they are unhappy with anything they come across. A specific esafety afternoon is held for Year 6 children in the term before they move onto senior school. Brief details are listed below, further information is available in the curriculum booklets on the school website or from the Digital Learning Leader.

Form 1 – Lee and Kim's Magical Adventure, Keeping Safe on the Internet Form 2 – Hector's World – What is personal information and when should it be given out; how to identify people who can be trusted; understanding situations which may become risky online and what to do Form 3 – digi-dot-com – the purpose and safe use of technologies, keeping personal information secret Form 4 – Exploring the Think U Know cyber café Form 5 – Jigsaw – using social networking safely; understanding that profiles should be set to private, to only talk to people who are known and trusted in the real world and what to do if things go wrong.

Form 6 – Think U Know presentations

5. Training and Guidance for Staff

Staff members receive guidance as part of their induction and at least annually as part of their ongoing professional development. On 4th September 2015, all teaching staff attended an esafety training course delivered by Cambridge Education. Contracts of employment require teachers to agree to the school's procedures for the use of technology.

6. Reporting Mechanisms

A member of the Senior Management Team may inspect, or ask Chelmer IT to inspect, any ICT equipment owned or leased by Widford Lodge at any time without prior notice. They may also monitor, intercept, access, inspect, record and disclose telephone calls, emails, messages, internet and any other electronic communications involving Widford Lodge employees or contractors, without consent, to the extent permitted by law. Any such activities will comply with the Data Protection Act 1998, the Human Rights Act 1998, the Regulation of Investigation Powers Act 2000 and the Lawful Business Practice Regulations 2000.

Any breach or suspected breach of policy by a school employee, contractor or pupil may result in the temporary or permanent withdrawal of school hardware, software or services. Any policy breach is grounds for disciplinary action and may also lead to criminal or civil proceedings.

Staff, parents and pupils must report any security breaches or attempts, loss of equipment or unauthorised use or misuse of ICT to the Headmaster or Designated Safeguarding Lead.

All esafety incidents will be logged on the safeguarding concerns file.

Accidental access to inappropriate materials by pupils or staff should be reported to the Digital Learning leader, who will inform the Headmaster and Chelmer IT.

Any concerns, complaints or issues raised with regard to esafety will be recorded and actioned promptly and in line with the relevant policies.

7. Communication and Education for Parents

Parents are invited to attend annual esafety sessions run by the Digital Learning leader, as well as having to sign an internet agreement when their child joins the school. They are welcome to raise any concerns with the class teacher, the Digital Learning leader or the Designated Safeguarding Lead, which will be dealt with promptly and appropriately.

8. Management of Personal Data

As detailed in the introduction to this policy, Widford Lodge holds and processes personal data about pupils, staff and parents/guardians for a variety of reasons and takes seriously its responsibility for this data.

Parents sign to give permission for images of their children to be used and stored for a variety of purposes: where such permission is not given, all relevant members of staff are made aware.

The school follows the 2009 Becta guidelines – Leadership and Management – Security – Data handling security guidance for schools.

Pupils and parents/guardians are entitled to be provided with: the information processed about then, where the information was collected, why it was processed and who it was disclosed to.

The school holds personal data for the period during which the pupil attended Widford Lodge, with the exception of records selected to be kept for record purposes, including any Special Educational and Disability Needs or child protection information, and statistical data.

Electronic data is protected by password and firewall systems. Computer workstations in administrative areas are positioned so that they are not visible to casual observers. Similarly, data stored in paper form is stored securely and where it is not easily accessible to anyone without a legitimate reason to see it.

Personal data will only be disclosed to organisations or individuals whose identity has been verified and for whom consent has been given to receive the data, or to organisations that have a legal right to receive it without consent being given.

Appendices

- A Pupil and Parent Internet Agreement
- **B** Legislation relevant to esafety
- C Useful references/Information

PREPARATORY SCHOOL

Use of the internet: Home-School Agreement (Parents' Copy)

- All pupils are expected to read and agree the Internet Agreement and to be responsible for their own behaviour on the Internet, just as they are anywhere else in school. This includes materials they choose to access, and language they use.
- Pupils using the World Wide Web are expected not to deliberately seek out offensive materials. Should any pupils encounter any such material accidentally, they are expected to report it immediately to a teacher
- Pupils are expected not to use any inappropriate language in their e-mail communications and contact only people they know or those the teacher has approved. It is forbidden to be involved in sending or the passing on of chain letters
- Pupils must ask permission before accessing the Internet
- □ Pupils should not access other people's files unless permission has been given.
- Computers should only be used for schoolwork and homework unless permission has been granted otherwise.
- No program files may be downloaded to the computer from the Internet.
- □ No programs on disc or CD Rom should be brought in from home for use in school.
- Homework completed at home may be brought in on a memory stick but this will have to be virus scanned by the class teacher before use.
- Personal printing is not allowed on our network for cost reasons (e.g. pictures of pop groups/cartoon characters)
- No personal information such as phone numbers and addresses or any part thereof should be given out and no arrangements to meet someone made unless this is part of an approved school project
- **D** Pupils choosing not to comply with these will be denied access to Internet resources.

The school may exercise its right to monitor the use of the school's computer systems, including access to websites, the interception of e-mail and the deletion of inappropriate materials where it believes unauthorised use of the school's computer system is or may be taking place, or the system is or may be being used for criminal purposes or for storing unauthorised or unlawful text, imagery or sound.

PREPARATORY SCHOOL

Responsible Internet Use (Pupil Copy)

These rules help us to be fair to others and keep everyone safe.

- I will ask permission before using the Internet.
- I will use only my own network login and password.
- I will only look at or delete my own files.
- I understand that I must not bring software or disks into school without permission.
- I will only e-mail people I know, or my teacher has approved.
- The messages I send will be polite and sensible.
- I understand that I must never give my home address or phone number, or arrange to meet someone.
- I will ask for permission before opening an e-mail or an e-mail attachment sent by someone I do not know.
- I will not use Internet chat.
- If I see anything I am unhappy with or I receive messages I do not like, I will tell a teacher immediately.
- I understand that the school may check my computer files and the Internet sites I visit.
- I understand that if I deliberately break these rules, I may not be allowed to use the Internet or computers.

The school may exercise its right to monitor the use of the school's computer systems, including access to websites, the interception of e-mail and the deletion of inappropriate materials where it believes unauthorised use of the school's computer system is or may be taking place, or the system is or may be being used for criminal purposes or for storing unauthorised or unlawful text, imagery or sound.

PREPARATORY SCHOOL

Responsible Internet Use Consent Form

Please complete, sign and return to the school secretary

Pupil's Agreement

I have read and I understand the school Rules for Responsible Internet Use. I will use the computer system and Internet in a responsible way and obey these rules at all times.

Signed:

Parent's Consent for Internet Access

I have read and understood the school rules for responsible Internet use and give permission for my son / daughter to access the Internet. I understand that the school will take all reasonable precautions to ensure pupils cannot access inappropriate materials. I understand that the school cannot be held responsible for the nature or content of materials accessed through the Internet. I agree that the school is not liable for any damages arising from use of the Internet facilities.

Dear Parents

Responsible Use of the Internet

As part of your child's curriculum and the development of ICT skills, Widford Lodge Preparatory School provides supervised access to the Internet. We believe that the effective use of the World Wide Web and e-mail is worthwhile and is an essential skill for children as they grow up in the modern world. Please would you read the attached Rules for Responsible Internet Use and sign and return the consent form so that your child may use Internet at school.

Although there are concerns about pupils having access to undesirable materials, we have taken positive steps to reduce this risk in school. Our school Internet provider operates a filtering system that restricts access to inappropriate materials. This may not be the case at home and we can provide references to information on safe Internet access if you wish. We also have leaflets from national bodies that explain the issues further.

Whilst every endeavour is made to ensure that suitable restrictions are placed on the ability of children to access inappropriate materials, the School cannot be held responsible for the nature or content of materials accessed through the Internet. The School will not be liable for any damages arising from your child's use of the Internet facilities.

Should you wish to discuss any aspect of Internet use please contact the School Office to arrange an appointment.

I would ask you to look through these rules and discuss them with your child and then return the signed form to us at school.

Thank you for your co-operation

Yours faithfully,
