

Widford Lodge

PREPARATORY SCHOOL

13a, 13c and 13d

First Aid, Accident Reporting and Medication Policy

This policy applies to all pupils at Widford Lodge School including those in the EYFS

Reviewed and Approved by the Proprietor: November 2021

Next Review: December 2022

Introduction

At Widford Lodge Preparatory School we are committed to: ensuring that first aid needs risk assessments are carried out for significant activities; providing every pupil, member of staff and visitor with adequate first aid; ensuring pupils and staff with medical needs are fully supported and suitable records of assistance required and provided are kept; first aid materials, equipment and facilities are available as required by the risk assessments; and procedures for administering medicines and providing first aid are in place and reviewed regularly.

This includes ensuring:

- Sufficient and appropriate resources, training and facilities
- Ensuring HSE regulations on the reporting of accidents, diseases and dangerous occurrences are met
- Clear authorisation from and communication with pupils' parents/carers regarding medical treatment.

Procedures and information set out in this document aim to ensure that:

- All members of the school community are aware of this policy and the procedures to follow in the event of an accident or emergency, the support available and the role that they play, as well as the requirements of individual healthcare plans
- There are sufficient numbers of trained staff as Appointed Persons and First Aiders (defined as those who have received the Emergency First Aid at Work training or Schools First Aid training), including Paediatric First Aid, to meet the needs of the school and pupils with individual healthcare plans, including in contingency and emergency situations
- Medicines are recorded, handled, stored and administered responsibly
- First aid provisions are available at all times while pupils or employees are on school premises, and also off the premises whilst on visits or trips
- All appropriate incidents involving medical assistance are properly recorded.

This policy was drawn up in conjunction with: The Health and Safety at Work etc Act 1974; DfE Guidance on First Aid for Schools; DfE Guidance on Supporting Pupils at School with Medical Conditions 2014; the Independent School Standards; The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013.

This policy is available on the school's website and on request from the school office. It has safety as its highest priority: safety for the children and adults receiving first aid or medicines and safety for the adults who administer them.

Widford Lodge Preparatory School is fully committed to ensuring that the application of this policy is non-discriminatory in line with the UK Equality Act 2010.

This policy is reviewed annually by the Appointed Person for First Aid and the senior leadership team as well as the Proprietor, or as events or legislation dictate, and updates are communicated to staff.

The school also has a Control of Infections Policy which all staff should be aware of. The school is appropriately insured and staff are aware that they are insured to support pupils with regard to first aid and medical conditions. Staff accompany pupils as appropriate to the office or medical room and the school does not prevent pupils from eating, drinking or taking breaks when they need to.

Roles and Responsibilities

The **Proprietor** has ultimate responsibility for health and safety matters including first aid. She is responsible for ensuring that the first aid risk assessment and provisions are reviewed annually and/or after any operational changes, to ensure that these remain appropriate for the activities undertaken and that first aid materials, equipment and facilities are provided according to the findings of the risk assessment.

The **Headteacher** is responsible for ensuring:

- She reviews the assessment of first aid needs annually and/or after any significant changes and that other appropriate risk assessments are completed and required measures put in place;
- there is a First Aider on site whenever there are children present and someone with the relevant paediatric First Aid training whenever there are EYFS children present – including offsite visits, and that the number of First Aiders is adequate to provide first aid cover during the school day, for offsite trips and activities and for after school activities.
- First Aiders have an appropriate qualification, that training is up to date and First Aiders are competent to perform their role and that their names are prominently displayed at key points around the school,
- all staff are aware of first aid procedures
- she reports specified incidents to the Health and Safety Executive when necessary
- adequate space is available to cater for the medical needs of pupils.

The Appointed Person for First Aid is Nicki Blundell. She is a Higher Level Teaching Assistant and is available to give advice to all members of staff. In her absence Sam Pawsey, Deputy Head Pastoral will act as the Appointed Person.

The Appointed Person for First Aid takes charge of first aid arrangements and the role includes looking after the first aid equipment and facilities. She will ensure that:

- Pupils with medical conditions are identified and properly supported at school, including helping staff with implementing individual healthcare plans
- She works with the Headteacher to determine the training needs of staff

- First aid and medicines are administered in line with current training and the requirements of this policy
- Supplies of first aid materials are available at various locations throughout the school and checked regularly with regard to minimum requirements, contents, quantity and use by dates and replacements arranged as necessary
- Information on the location of equipment and facilities is provided to staff
- Records of first aid treatments and accidents are properly maintained and investigated as necessary
- First Aid issues are escalated to the Deputy Head Pastoral, who will report these to the Health & Safety Committee
- She or someone with appropriate training and seniority takes charge when someone is injured or becomes ill and that an ambulance or other professional help is summoned when appropriate
- There is appropriate communication with parents/carers especially for any pupils who have received any kind of medical attention during the day, including any medication given, other than for very minor incidents.

A number of staff have received current suitable First Aid training and have a qualification approved by the HSE (see Appendix A). This training enables them to give emergency first aid to someone who is injured or becomes ill whilst on the school premises. Training is renewed every three years.

Trained staff are based in a variety of locations around the school site. First Aid assistance can always be called for via the school office (01245 352581) if immediate adult assistance is unavailable.

First Aiders are responsible for acting as first responders to any incidents, assessing the situation and providing immediate and appropriate treatment. They will record details of treatment given in line with the reporting procedures in this document and keep their contact details up to date.

A pupil can only be sent home to recover from illness or an accident after approval from a member of the senior leadership team.

Staff trained to administer medicines must ensure that only prescribed medicines are administered in line with the parental permission outlining the type, dosage and time of the medicine and that appropriate records are kept. Wherever possible, the pupil will administer their own medicine under the supervision of a trained member of staff. Should a pupil refuse to take their medication, staff will inform the parents accordingly.

All staff are informed about First Aid provision on employment and are required to:

- Ensure they are aware of and follow the First Aid Policy and procedures and know who the First Aiders are and contact them straight away as necessary.
- Report and record all incidents they attend where a First Aider is not called.

- Advise the Headteacher or their line manager of any specific health conditions or first aid needs.
- Ensure appropriate risk assessments and adequate First Aid provision form part of the planning for any school trip or activity. This should be done in consultation with the Educational Visits Coordinator, Edward Callaway. The residential first aider will administer and record first aid on residential trips and trained first aiders will carry a travel first aid kit on day trips.

First Aid Equipment and Information

The Medical Room (Sick Bay) is located on the first floor of the main building.

First Aid Boxes are clearly labelled with a white cross on a green background. They are located in the following areas:-

- School Office
- Science laboratory
- Art Room
- Pre-School
- The Kitchen (blue box with white cross)
- The Reception classroom
- First Aid Kits for travelling and for matches are held in the Medical Room
- Eye wash stations are situated in the Science laboratory, Art Room, Office, Reception classroom and Medical Room

The site manager has spillage kits and is the first point of contact for such occurrences. There are also spillage kits located in the Medical Room and in the shed.

The defibrillator is located under the bicycle shelter on the “out” driveway. Staff have watched a training video for the use of the defibrillator. The local NHS ambulance service have been notified of its location.

The Appointed Person for First Aid will ensure that the contents of all First Aid containers/stations and spillage kits are regularly checked and restocked.

Pupils’ medication is stored either in the locked fridge in the Medical Room or in the locked cupboard in the Office.

In the case of a residential trip, the residential first aider will administer first aid and complete the report. For day trips, a trained First Aider will carry a first aid kit in case of need.

What to do in the event of an incident requiring medical assistance

a) If a person becomes unwell

A pupil, member of staff or visitor who becomes unwell during a lesson or activity may, if they are able, be sent to the school office to seek assistance. They should be

accompanied by another person. Parents will usually be contacted and asked to collect a pupil if they become unwell.

b) If a person is involved in an accident or medical emergency

- Call for assistance from the nearest First Aider or if you are qualified in first aid seek assistance from the nearest member of staff (a runner can be sent with the red emergency card from the room to find the nearest adult)
- Ensure that other children/adults in the vicinity are safe and supervised
- The First Aider will take charge and co-ordinate the administration of first aid, deciding upon any additional medical assistance required, including requesting an ambulance.
- At least one member of staff should stay with the casualty at all times – this may include escorting them to hospital if required
- If they are not already present, inform the Appointed Person for First Aid immediately of the incident/accident
- Should an ambulance be required dial 999. Ideally, DO NOT LEAVE THE CASUALTY ALONE in order to do this – ask a colleague (if you send someone else to make the call, ensure that you tell them to return straight to you in order to inform you of the 999 call having been successfully made)
- After an ambulance has been requested, if they have not already been alerted, inform the Headteacher or a member of the Senior Leadership Team - they will, in turn, inform relevant senior colleagues
- A senior member of staff will contact the parents and explain the situation, arranging where the parent should come to meet the child, either at school or at hospital. It is vital therefore that parents provide the school with up to date telephone numbers.
- A member of staff should await the arrival of the emergency services and will direct them appropriately
- Ideally, a familiar member of staff will accompany the casualty in the ambulance and at the hospital until the parent/carer arrives
- Where there is an urgent need for surgical or medical treatment to be given and the parents cannot be contacted, the decision about the competence of the pupil to give or withhold consent to urgent surgical or medical treatment, in the absence of the parent, must be the responsibility of the doctor
- All incidents must be recorded in line with the recording and reporting procedures set out below.

Hygiene and infection control when dealing with a medical incident

- Common sense infection control measures (hand washing, use of disposable gloves when dealing with blood or bodily fluids) must be followed by all staff when dealing with medical incidents
- Hand washing facilities are available throughout the school

- Single use disposable gloves are to be found in First Aid kits and must be used at all times when providing treatment involving blood or body fluids
- The site manager_(when available) should always be called to deal with the clearing up of spillages of bodily fluids and any items contaminated must be disposed of in the bin marked for clinical waste.

Dealing with Bodily Fluid Spillages (Bio Hazards)

The school has a duty to protect its staff from hazards encountered during their work; this includes bio-hazards, which for the purpose of this document are defined as Blood, Vomit, Faeces, Urine and Wound drainage.

In the event of a spillage the following precautions should be applied:-

- Notification by placing warning signs
- Staff dealing with biohazards should wear protection
- Staff should access spillage kits in order to clean up promptly
- Waste should be disposed of in the bin marked *Clinical Waste*
- Hand hygiene should be carried out following management of the spillage

Head injuries

All head injuries should be regarded as potentially serious, irrespective of the extent of external injury. It is important to monitor any person with a head injury very carefully, looking for key signs such as sickness, dizziness, incoherence or drowsiness. If in doubt, or if any of the key signs are exhibited, seek medical help.

Parents may be called and asked to collect their child and seek expert medical attention. The person dealing with the injury will ensure that the parents of any pupil who has required treatment for a head injury are informed, either verbally or in writing, on the day the injury occurs, to enable them to continue monitoring their child's recovery. In addition, where practical, the Appointed Person will be informed of head injuries necessitating parental contact. Pupils with head injuries will be given a green wrist band to wear as a visual alert to staff and parents. The date and time of the head bump will be written on the wrist band by the person dealing with the injury.

Accident reporting and record keeping

Where there is an accident or medical emergency and First Aid assistance has been provided, the person who has administered First Aid should record the incident as outlined below.

Parents will be informed of any significant accident or injury sustained by their child on the same day, and must be kept sensibly informed by an appropriate member of staff. This contact with parents is recorded on the accident form.

A record is kept of all children spending time in the medical room, even where no treatment is administered or no accident has occurred, e.g. a child who has a lie down for an hour but returns to lessons/the school day.

Playground injuries and similar are recorded on accident forms by the person attending to the casualty or dealing with the incident on the day it happened. Accident files and forms are located in either the Pre-School, Room 1 (for Reception children) or the Office for Pre Prep and Prep children.

The records of first aid treatment given by a First Aider or Appointed Person must include:

- Date, time and place of incident
- Name and class of injured/ill person
- Details of the injury/illness and what first aid treatment was given
- Name and signature of the First Aider or Appointed Person dealing with the incident
- Whether or not parents were contacted and if so, by who and at what time

The accident files are reviewed each half term by the Health and Safety Committee for completeness and for patterns of accidents. The accident files for the current academic year are kept in the office and after that are stored in the archive room, where they are retained for a minimum of three years and then securely disposed of.

All more serious accidents will be investigated as soon as they occur by the Headteacher, so that any problem areas or procedures are identified and remedial action can be taken if necessary. Problems identified and actions taken are reviewed by the Health and Safety Committee.

First aid administered to staff and visitors is recorded in a separate accident book from the file used to record pupil details.

Consideration will be given to whether accidents to pupils, staff and members of the public are in any way attributable to defective premises or equipment or lack of supervision and whether any corrective action is required.

Informing the HSE (Health & Safety Executive) under RIDDOR (Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013) – statutory requirements.

The Headteacher is responsible for determining if the HSE needs to be informed of an accident or incident, making the report via www.hse.gov.uk/riddor/online and keeping the copy received in the Office. The report will be made as soon as reasonably practicable and within 15 days of the incident.

Under RIDDOR the following accidents must be reported to the HSE without delay:

- Accidents to employees resulting in death or specified injury as defined by RIDDOR (including as a result of physical violence)
- Dangerous occurrences

- Accidents to employees which prevent the injured person from doing their normal work for more than 7 days must be reported within 15 days of the accident.
- Accidents to pupils or visitors involved in a school activity that result in death or injury in connection with a work activity and where the person is taken directly from the scene of the accident to hospital for treatment
- Near miss events that do not result in an injury, but could have done.

The Headteacher will keep a record of any reportable injury, disease or dangerous occurrence which must include: the date and method of reporting; the date and time of event; personal details of those involved; and a brief description of the nature of the event or illness.

Details of RIDDOR accidents will be made available to the Health & Safety Committee, which includes the Proprietor. The Headteacher will notify the local authority of any serious accident or injury or the death of a pupil while in the school's care.

Administration of Medicines

Most pupils will at some time have a medical condition that may affect their participation in normal school life. This may either be a short term condition which is quickly resolved or a long term condition with pupils having medical needs that limit their access to education. At Widford Lodge we aim to work with parents to provide measures to minimise the impact of medical difficulties on the child's school life.

Parents/guardians have the main responsibility for their children's health and should provide the school with information about the child's medical conditions. Whilst there is no legal duty requiring staff to administer medicines or supervise pupils taking their medicines, we will endeavour to accommodate pupils' medical needs in close cooperation with parents. Thus, while it is not our policy to care for sick pupils who should be at home until they are well enough to return to school, we will agree to administer medication as part of maintaining their health and well-being or when they are recovering from an illness.

If a child is prescribed medication to be taken during the school day, parents/guardians must complete a medication form, available via the school office or website, when bringing the medication to school; this must include the type of medicine, dosage and time to be given. Medication for children in the Pre-School and Reception should be handed to a member of the Pre-School/Reception staff. All medications for children in the Pre-Prep and Prep School should be handed into the Office.

All medicine must be stored securely in the Medical Room, with the exception of EYFS. At no time should any child carry with them prescribed/unprescribed medication (with the exception of inhalers and epipens) e.g. painkillers. Each administration of the medication is recorded on the relevant form and must be signed by the trained administering staff. Older children are expected to take some responsibility for remembering to go to the Office to take their medicine. We will not administer non-prescribed medicines at school.

Arrangements for Pupils with particular Medical Needs

All staff are required to be aware of children with particular medical conditions and must ensure that their needs are included in any risk assessments for activities at school and trips outside the school. We will consider the reasonable adjustments necessary to enable pupils with medical needs to participate fully and safely in all aspects of school life and will not create unnecessary barriers to pupils' participation. However, school staff may need to take extra care in supervising some activities to ensure that these pupils and others are not put at risk.

Individual health care plans for pupils with special medical needs, including those with asthma and serious allergies which have a risk of anaphylaxis shock, are agreed with parents, recorded and displayed in strategic parts of the school such as the kitchen, the staff room and the Medical Room. These will help to identify any necessary safety measures to support the pupils and ensure they are not put at risk. Parents have prime responsibility for their child's health and should provide us with information about medical conditions, in conjunction with their child's GP and paediatrician. This information is requested when a child joins the school and all parents are asked to review and confirm the details held for their child at the start of each academic year. Individual health care plan details are updated and displayed within the first week of a new diagnosis and/or at the start of each academic year. The school appreciates that pupils with the same medical condition do not necessarily require the same treatment.

Reliever inhalers are carried by the owner. Since September 2014, schools have been able to hold spare emergency inhalers; parents of all children with asthma at Widford Lodge have given written permission for the use of the spare school inhaler in the event of an emergency, when their own is absent.

Unless otherwise stated, two EpiPens/Jextpens are required for children who need them, at least one of which will be kept in the Office. Additional pens are kept in an anaphylaxis child's emergency bag, located within the classroom setting in the Pre – School, Reception and Pre-Prep and either within the classroom setting or carried by the pupils themselves in the Prep School. Should a child with anaphylaxis leave the site, it is the teacher's responsibility to ensure that they have their emergency bag with them. The individual child's health care plan is also kept within their emergency bag so that staff can refer to it in an emergency.

Where relevant, additional staff training will be provided on specific medical conditions, including the associated care required.

Medical needs of the staff are not the responsibility of the Appointed Person. The Headteacher will make reasonable adjustments when informed of a medical condition by a member of staff and staff will be asked to confirm that any medication is unlikely to impair their ability to look after children properly and that any medication brought onto school premises is kept securely away from children.

Contagious Illnesses – See our Control of Infections Policy

To prevent the spread of illness, any child who has been diagnosed with a contagious illness eg, chicken pox, impetigo etc is asked to remain at home until they are no longer contagious. Parents are asked to inform the school as soon as possible that their child has an infectious illness so that the school can send a letter of information out to other parents.

In the event of a child suffering from sickness and/or diarrhoea, parents are asked to inform the school and the child must remain absent from school until they have been clear of all symptoms for at least 48 hours. The school will liaise with parents and exercise discretion where the cause of sickness is not linked to a potential illness.

If a child has a case of head lice, the parents are asked to inform the school and treat their child with the appropriate shampoo before returning them to school. If a child has complained of a symptom and is suspected to have head lice whilst at school, the class teacher or the office staff will telephone the parent asking for the child to be taken home and the appropriate shampoo applied before returning to school.

If a child has been diagnosed with conjunctivitis, they are asked not to attend school for 24 hours after starting the appropriate eye drops or ointment. If a child displays the symptoms of conjunctivitis whilst at school, the parent will be contacted and asked to collect their child and take them to a doctor to receive the appropriate treatment. The child may then return to school after 24 hours.

Additional Medical Protocol for EYFS (Pre school & Reception)

Caring for a child taken ill during the school day:

- If a child becomes unwell during the Pre-School day they will be taken into the library area where they can lie down. Another member of staff will phone the parents and if they are not available will continue to phone other people on the child's emergency list.
- For Reception children the learning support assistant will stay with the child in a quiet area of the Reception classroom. The parents will be contacted and if they are not available we will continue to phone other people on the child's emergency list.
- When the parent/carer arrives to pick up the child, the member of staff who has been supervising the ill child will fully inform them as to the sequence of events.
- If we believe the child's illness to be severe and the parent is unwilling to pick their child up, we will insist they are collected and if necessary phone the next person on the child's emergency list.

Allergies:

At the beginning of Pre-school and Reception parents are asked to fill out a Health and Dietary form which asks for details of any allergy the child may have and any foods they would prefer them not to have, in addition to any pre-existing medical conditions that we should be aware of. Any changes in condition should be reported to a member of staff immediately so the information can be updated. The same procedures as for the rest of the school will be followed, for example agreeing a care plan with parents and displaying this in relevant places around school. In the unlikely event of a child reacting to a food or other substance the parents would be contacted and informed of their child's reaction and any medication administered. We would advise them to come to collect their child and seek

further medical advice. A member of staff would remain with the child at all times in case the reaction worsened.

If a severe reaction occurs, we would again follow the instructions set out on the child's medical form. If an epi-pen is provided and is needed, a member of staff would administer this and stay with the child whilst another member of staff telephoned 999 and the parents. If a child suffers an allergic reaction to something new that we are unaware of, we would comfort the child, seek urgent advice from the paediatric first aiders, then contact the parents/emergency contact. In a severe case we would dial 999 and a member of staff would accompany the child to the hospital.

Administration of Medicine:

- Before starting in the EYFS parents complete a medical/dietary requirements form.
- No medicine must be administered to a child without the parent's written permission. For the Pre-school there is also a long term medical form for those with asthma and allergies who may need medication whilst at school. Medicines must be in the original container in which they were dispensed, with the prescriber's instructions for administration.
- Child's name, medicine and time should be clearly written on the form and communicated to all staff by being written on the white board.
- All medicines for Pre-School children are to be kept in the Pre School staff kitchen either in the fridge or in the locked first aid cabinet.
- Reception children – Medicine is kept securely in the Reception classroom.
- Before administering any medicine **READ** the instructions carefully and check it has the correct name and dosage on the label and is in date.
- Once the medicine has been administered the medicine form should be filled out immediately.
- The parent must then sign the medicine form when the child is collected.
- Written records for all medication administered to every child in the care of the EYFS (and whole school) are retained.
- Medicine will not be administered if it has not been clearly prescribed for that particular child by a doctor, dentist or pharmacist
- We will only administer non-prescription medication – pain/fever relief if there is a health reason to do it and written consent has been gained from parents
- Any staff medication is locked in either the Pre School kitchen or the staff room.

All staff are aware of how to use an epi-pen and JEXT pre-filled pen and have had training using a 'trainer epi-pen'. Any specific training will be undertaken when/where necessary.

Accidents and minor injuries:

The Pre-School first aid box is in the staff kitchen clearly marked 'first aid'. We have a medical bag which accompanies us when we are outside of the Pre-School that has a supply of medical necessities for falls, grazes and bumped heads. There is a further supply of first aid equipment in the medical room which is located adjacent to the Pre-School. Reception have their own first aid box kept in the Reception classroom on the top shelf of the bookcase. Head injuries will be dealt with following the same procedures as outlined for the rest of the school and parents notified by phone as soon as the child is settled.

If there is a concern relating to an injury then we will immediately contact a Paediatric first aider. Minor injuries will be written in the accident book, stating name of child, date and time of injury, action taken and how the accident occurred. A member of staff will sign this and ask the parent to sign it when they collect their child. If there is a concern relating to an injury then the parent would immediately be contacted.

Major Accident:

If a child falls and hurts themselves seriously whilst at school the same procedures would apply as detailed earlier in this policy for the rest of the school.

Appendix A - List of First Aiders

The Appointed Person for First Aid at Widford Lodge is Nicki Blundell and in her absence is Sam Pawsey. The role of this appointed person is to take charge of first aid arrangements and includes looking after the first aid equipment and facilities and calling the emergency services when required.

Name	Qualification	Expiry Date
Andrew Blundell	Schools First Aid	Jan 2025
Jennifer Cole	Schools First Aid	Jan 2025
Michelle Cole	Schools First Aid	Jan 2025
Edward Callaway	Emergency first aid at work L3	Sep 2023
Amanda Dexter	Schools First Aid	Jan 2025
Rupert Eley	Schools First Aid	Jan 2025
Nicky Hall	Schools First Aid	Jan 2025
Emma Hodgkiss	Schools First Aid	Jan 2025
Robert Hopgood	Schools First Aid	Jan 2023
Fiona Jenkins	Schools First Aid	Jan 2025
Nicola Kell	Schools First Aid	Jan 2025
Catherine Kenton	Schools First Aid	Jan 2025
Helen Kimp	Schools First Aid	Jan 2025
Louise Knight	Schools First Aid	Jan 2025
Nina Lawrenson	First aid for appointed persons	Dec 2023
Lin Moss	Schools First Aid	Jan 2025
Samantha Pawsey	Schools First Aid	Jan 2025
Claire Palmer	Schools First Aid	Jan 2025
Isobel Palmer	Schools First Aid	Jan 2025
Naomi Poole	Schools First Aid	Jan 2025
Dawn Scorrar	Schools First Aid	Jan 2025
Vicki Scott	Schools First Aid	Jan 2025
Jo Taylor	Schools First Aid	Jan 2025
Martin Taylor	Schools First Aid	Jan 2025
Georgina Tweed	Schools First Aid	Jan 2025
Alex Waterhouse	Schools First Aid	Jan 2023
Catriona Williamson	Schools First Aid	Jan 2023
Michelle Zahl	Schools First Aid	Jan 2025
Lisa Beck	Paediatric First Aid	Jan 2025
Nikki Blundell	Paediatric First Aid	Jan 2025
Jayne Bridgeman	Paediatric First Aid	Feb 2025
Jacky Brooks	Paediatric First Aid	Sep 2024
Sandy Burdge	Paediatric First Aid	Sep 2024
Amanda Cockett	Paediatric First Aid	May 2024
Cheryl Cloake	Paediatric First Aid	Sep 2024
Kathy Cogman	Paediatric First Aid	June 2024
Penny Doyle	Paediatric First Aid	Mar 2023
Stacy Hilton	Paediatric First Aid	Oct 2023
Rosie Kellman	Paediatric First Aid	Sep 2024
Kim Perugini	Paediatric First Aid	May 2025
Debbie Poston	Paediatric First Aid	Oct 2023
Julie Smethurst	Paediatric First Aid	Jan 2025
Sarah White	Paediatric First Aid	Jun 2024

Those with the Emergency First Aid at Work, Schools First Aid and Paediatric First Aid qualifications are also permitted to administer prescribed medicines.

Appendix B – Epipen Emergency Instructions

Step 1:

- Assess the situation
 - The stages described below may merge into each other **rapidly** as a reaction develops
- Send someone to get the emergency kit / Epipen, which is kept in the school Office

Step 2:

SYMPTOM

Mild Reaction

- Generalised itching
- Mild swelling of lips or face
- Feeling unwell / nausea
- Vomiting

ACTION

Mild Reaction

- Give ***antihistamine*** immediately
- Monitor child until you are happy (s)he has returned to normal
- If symptoms worsen see

Severe Reaction

- Difficulty breathing / choking / coughing
- Severe swelling of lips/face/eyes
- Pale/floppy
- Collapsed/unconscious

Severe Reaction

- Get the *Epipen* out
- Send someone to **telephone 999** and to tell the operator that the child is having an **Anaphylactic reaction**
- Sit or lie the child on the floor
- Remove the blue/grey safety cap from the Epipen
- Hold the Epipen approximately 10cm away from the outer thigh
- Swing and jab the black tip of the EpiPen firmly into the outer thigh at a right angle. **Make sure a click is heard and hold the Epipen in place for 10 seconds**
- Remain with the child until the ambulance arrives
- Place used Epipen into container, without touching the needle
- Contact parent/carer
